Working Paper **In Search of Sparsity:
Bayesian Sparse Factor Models and the Factor Zoo**
with Fahiz Baba-Yara

We apply a Bayesian Sparse Factor Model to the time series of observable risk factors to reduce the dimensionality and uncover latent factors. We combine the latent factors with a recently developed Bayesian Fama Macbeth regression (BFM) to assess how well they price the cross-section of returns.

Work in Progress **Panel Thresholds Predictive Regressions:
An Application to Emerging Market Exchange Rates**
with Paulo M. M. Rodrigues.

A methodology is proposed for identifying threshold effects in panel predictive regressions in which the predictor variables are strongly persistent.
